Illkirch, le December 01, 1991.

Your Royal Highness,

It makes the undersigned an enormous pleasure to inform Your Royal Highness that a new mathematical criterion for recognizing prime numbers from composite ones is from today on entitled "Princess Shirley's Criterion".

Both myself and my research assistant congratulate Your Royal Highness by this occasion.

HRH Prince Leonard of the Hutt River Province, had communicated to me some of his mathematical manuscripts that I found of great interest and I do hope that in a short while these will be available to the international scientific community.

Respectfully yours,
